- Absorption Costing
- Variable Costing
- Activity-Based Costing (ABC)

Sample Question:

Explain the differences between absorption costing and variable costing, including their implications for decision-making.

Variable costing only assigns variable manufacturing costs, treating fixed costs as period expenses. This impacts decisions related to pricing, product line analysis, and profit evaluation.

Key Points:

- Absorption costing complies with GAAP, suitable for external reporting.
- Variable costing aids in understanding contribution margins and short-term decisions.
- Managers use both methods for different analytical purposes.

Sample Question:

Describe the process of analyzing variances in materials and labor costs, and explain how managers can respond to unfavorable variances.

Answer Summary:

Variance analysis involves calculating variances, investigating causes, and implementing corrective actions. Unfavorable variances may indicate inefficiencies, supplier issues, or inaccurate estimates. Managers respond by reviewing processes, renegotiating terms, or adjusting future budgets to improve performance.

Key Points:

- Types of variances: price, quantity, efficiency.
- Root cause analysis is essential for targeted improvements.
- Variance reports inform operational adjustments and strategic decisions.

3. Performance Measurement and Control Systems
