By 2006, Albania had undergone considerable transformations in its educational system, transitioning from a centrally planned framework to a more decentralized and reform-oriented approach. The early 2000s marked a period of intense efforts to improve curriculum standards, teacher training, and assessment methodologies. The 2006 matura was a culmination of these reforms, aiming to implement a more rigorous and transparent evaluation process.

The primary goal was to ensure that students completing secondary education possessed not only knowledge but also critical thinking and problem-solving skills necessary for higher education and the workforce. The exam was also viewed as a means to reduce disparities between different regions and schools, promoting equity and standardization.

Legal and Policy Foundations

The legal basis for the 2006 exam was rooted in the Albanian Education Law of 2004, which emphasized quality assurance, accountability, and the internationalization of curricula. The Ministry of Education and Science introduced specific regulations to govern the administration of the exam, including eligibility criteria, examination formats, grading standards, and security measures.

Furthermore, the reform aimed to align Albanian secondary education with European educational standards, facilitating student mobility and recognition of qualifications across borders. This alignment was reflected in the content and structure of the 2006 matura, which incorporated international best practices.
