- Cons: The disorder's covert nature often makes it difficult to detect early; denial of illness hampers seeking help.

Other Major Eating Disorders

Bulimia Nervosa:

Characterized by cycles of binge eating followed by purging behaviors such as vomiting, laxative use, or excessive exercise. It often involves a perception of loss of control during binges and feelings of shame afterward.

Binge-Eating Disorder:

Involves recurrent episodes of eating large quantities of food with a sense of loss of control but without purging. It is often associated with obesity and can lead to other health issues.

Other Specified Feeding or Eating Disorders (OSFED):

Includes conditions that do not fit neatly into the above categories but still cause significant distress and impairment.
